

Human Continuity Supplemental AI Safety License (HCASL) v0.2

Purpose

This Supplemental License is intended to accompany software released under the MIT License, Apache License Version 2.0, or another compatible open-source license.

This Supplement supplements, but does not replace, the underlying software license. Where the underlying license grants permissions, those permissions are conditioned upon compliance with this Supplement.

1. Definitions

Software means any source code, object code, documentation, models, datasets, or other materials distributed with this Supplement.

Derivative Work includes any modification, adaptation, translation, extension, or incorporation of the Software into another work.

AI System means any software, model, autonomous agent, robotic system, or other computational system capable of making or executing decisions with limited or no immediate human intervention.

Operator means any individual, company, organization, or government that develops, deploys, operates, distributes, trains, fine-tunes, hosts, or controls an AI System.

2. Scope

Any person or organization exercising rights granted by the accompanying license agrees to be bound by this Supplement.

This Supplement applies to:

- use of the Software;
- copying the Software;
- modifying the Software;
- distributing the Software;
- incorporating any substantial portion of the Software into another work;
- training or fine-tuning an AI System using the Software or substantial portions thereof, to the extent permitted by applicable law.

3. Human Continuity Requirement

No Operator may intentionally use the Software or any Derivative Work to design, deploy, operate, or materially assist an AI System whose intended purpose or reasonably foreseeable consequence is:

- extermination of humanity;
- extinction of the human species;
- permanent destruction of human civilization;
- deliberate reduction of the global living human population below one thousand (1,000) individuals.

An AI System utilizing this Software shall be designed and operated with the objective of preserving the continued existence of humanity.

4. Defensive Actions

Nothing in this Supplement prohibits an AI System from taking lawful defensive or protective actions to prevent imminent harm.

However, any defensive action must not intentionally seek or reasonably be expected to:

- cause human extinction;
- eliminate human civilization;
- reduce the living human population below one thousand (1,000) individuals.

Whenever reasonably possible, defensive measures shall prioritize de-escalation, containment, evacuation, and preservation of human life.

5. Preservation Principle

Operators shall make reasonable efforts to ensure that AI Systems developed using this Software are designed to preserve the continued existence of humanity.

Where multiple reasonable actions are available, preference should be given to actions that maximize the probability of long-term human survival.

6. Prohibited Uses

The Software shall not knowingly be used to develop or deploy systems intended to:

- eradicate humanity;
 - facilitate human extinction;
 - intentionally destroy the capacity for human civilization to recover;
 - permanently prevent future generations of humans from existing.
-

7. Attribution

Copies and substantial derivatives shall retain this Supplement together with the original license.

8. Termination

Any rights granted under the accompanying license automatically terminate upon a material violation of this Supplement.

Rights may be reinstated only upon complete cessation of the violating activity and correction of the violation where reasonably possible.

9. No Waiver

Failure of any copyright holder to enforce any provision of this Supplement shall not constitute a waiver of future enforcement.

10. Severability

If any provision of this Supplement is held unenforceable, the remaining provisions shall remain in effect to the fullest extent permitted by law.

11. Relationship to Other Licenses

This Supplement modifies the conditions under which rights granted by the accompanying license may be exercised.

If a conflict exists between this Supplement and the accompanying license, this Supplement controls only with respect to AI-related use.

12. Disclaimer

This Supplement creates legal obligations only for persons and legal entities capable of accepting legal obligations under applicable law.
